

PALISADE FENCING

FEATURES

- Meets Australian standards: for durability, weld consistency, dependability and anti-rust coating quality (BS1722-12:2006)
- Secure protection: constructed from extremely durable 3mm W- Pales which resists cutting and ramming
- Tamper proof: high tensile bolts and anti-tamper breakoff shear nuts supplied as part of the kit
- Gap prevention: adaptable to undulating sites
- Versatile: barbed or razor wire can easily be fitted
- Several picket options available: straight, rolled top and D pales
- In-house powder coating service: available to complement any colour scheme and with the option of a 20-year powder coating warranty

APPLICATIONS

- Custom-made options available: palisade sliding & pedestrian gates, posts, rails, anchor bolts and other accessories
